Key Themes:

Ethical AI and Responsible Data Use
Explore the importance of ethical considerations in AI and data science, addressing bias, transparency, and accountability in technology.

Transformative Applications of AI and ML
Discover how AI and machine learning are reshaping industries, from healthcare to finance, and learn about groundbreaking case studies and practical applications.

Future Trends in Data Science
Engage in discussions on emerging trends, tools, and methodologies that are defining the future landscape of data science.

MEET OUR SPEAKERS!

Andrej Karpathy
FORMER DIRECTOR OF AI AT TESLA, AI RESEARCHER

A prominent figure in deep learning, Karpathy has contributed significantly to neural networks and computer vision.

Katherine Gorman
CO-HOST OF THE "DATA SKEPTIC" PODCAST

With a strong background in data science and machine learning, Gorman focuses on the intersection of data and decision-making.

Dr. Yann LeCun
CHIEF AI SCIENTIST AT META, PROFESSOR AT NYU

A pioneer in deep learning and convolutional neural networks, Dr. LeCun has been instrumental in advancing the field of AI.
